

Young people, from kid to tween to teen, have active minds! Hurray! But when those active minds use the Internet, protection is needed.

weNetOK makes the Internet available on your terms — safely, at sites you approve.

Ideal for homework, skill-building games, and more in classrooms, youth centers, homes, and churches.

Change the culture

You can provide safety and freedom. No more watching over young ones' shoulders making sure they are safe. weNetOK's unique signal image lets you see from across the room whether they are browsing safe websites. Change your culture from watching and forbidding to relaxed and allowing.

Positive security

Filtering out every problem website is impossible. weNetOK uses a positive approach — users browse only approved websites. Links to unapproved websites are automatically disabled. weNetOK comes with pre-screened websites for math, reading, homework, science projects, games, and more.

Easy to manage

Just install and you're ready to go. Add websites to the approved list from any computer with just three clicks. Added websites are immediately available on every computer. Student enrollment is not required.

Affordable

Buy weNetOK once. weNetOK has no subscription hassles, no nagging to buy add-on products, no in-program advertising, no promotional pop-ups, and no promotion of commercial sites.

Home school helper

Use the Internet's incredible, free resources with peace of mind.

Block email, chat, downloads

With weNetOK, control potentially harmful activities.

Serious and fun

weNetOK is suitable for all ages using the Internet for study and fun.

An ideal gift

Grandparents, PTA, PTO — promote child safety. Give weNetOK as a gift. Online purchasing makes this easy.

No spying

weNetOK doesn't spy on users or track sites visited. The free trial doesn't require your email address or any registration.

Print Option

Save paper and ink by turning off the printing of web pages.

Protecting Children in the 21st Century Act

weNetOK can be a part of your school's strategy to meet the requirements of S.1492.

Uses Microsoft security updates Make the IT Department happy

weNetOK uses Internet Explorer to display websites. Microsoft provides the critical security updates every browser needs. When you run Windows Update, weNetOK is automatically updated.

weNetOK doesn't interfere with your existing system setup. weNetOK is compatible with school computer control programs.

Money back guarantee

weNetOK has a 30 day, no hassle, money back guarantee.

weNetOK Frequently Asked Questions

How does weNetOK work?

When you install weNetOK, a shortcut is created on your desktop. You start weNetOK from the shortcut.

weNetOK provides a protection wrapper for Internet Explorer and shows you the signal image on the upper right of the screen. If you just run Internet Explorer, there is no protection and you won't see the signal image.

weNetOK displays pages from websites that are on the approved websites list. When a user attempts to see a page that is not approved, the page will not be displayed.

Can websites be added?

Yes. The weNetOK Administrator may add websites. The Administrator role is password-protected so only the teacher or parent may add websites.

What if I lose my Administrator password?

Email [technical support](#) for help. We can help you recover your password.

When I look at certain web pages, part of a web page is not displayed. Why?

Normally, all of the content on a web page is displayed from the website you are viewing. Some web pages pull content from other websites. If the page content is not from an approved website, weNetOK does not display it. This assures that content is only displayed from sites that you approve.

What are the system requirements?

weNetOK works on Windows 2000, Windows XP and Windows Vista.

Buy weNetOK

weNetOK is available in single-user and network versions.

When you buy a network version, you install weNetOK on one computer and then use an included activation program to allow other computers on your network to access weNetOK. For network versions, the number of computers is limited, but the number of users is not limited.

Home

A single-user version of weNetOK for use on one computer. **\$9.95**

Home Network Version

Network version of weNetOK for use on up to three computers. **\$14.95**

Small Computer Lab

Network version of weNetOK for use on up to ten computers. **\$29.95**

Classroom

Network version of weNetOK for use on up to thirty computers. **\$44.95**

Site License

Site licenses are available for weNetOK and are easy to arrange. Please contact our [sales department](#) for pricing. Special home pricing is available for schools that have site licenses.

Download a free, fully-functional, 30-day trial of weNetOK at www.weNetOK.com/trial.html.

weNetOK Benefit Details

Change the culture

You can provide safety and freedom. weNetOK has a unique signal that lets you see from across the room whether young ones are browsing safe websites. weNetOK's signal is a special image that displays at the top right of the screen. When you see the image, you know that young ones are using weNetOK and browsing safely.

No more watching over young ones' shoulders making sure they are safe. No more arguments about what is or is not appropriate content. Young ones can freely explore the sites you have made available. Students can work without constant monitoring. And you can spend time on other activities or with students not using the computers.

Change your culture from watching and forbidding to relaxed and allowing.

Positive security

Filtering out every problem website is impossible. The web is constantly changing. Filters can't keep up with websites — the ones you wouldn't want young people to see — that are constantly trying to outwit the filters.

weNetOK uses a positive approach — users browse only approved websites. Links to unapproved websites are automatically disabled. For example, you may approve a news magazine website, but do not want students to be able to follow links the magazine offers to other sites. With weNetOK, you don't need to check every link on a website. If you haven't approved the link, it isn't available.

weNetOK comes with pre-screened websites for math, reading, homework, science projects, games, and more.

Easy to manage

Just install and you're ready to go. You can add Websites to the approved list from any computer with just three clicks.

The ability to easily add websites is important. Interests and needs change. Students will suggest websites; as the Administrator, you can review the websites and add them if you approve. Added websites are immediately available on every computer on your network.

Student enrollment is not required. You do not need to create special logons or student lists for weNetOK.

Affordable

Buy weNetOK once. weNetOK has no subscription hassles, no nagging to buy add-on products, no in-program advertising, no promotional pop-ups, and no promotion of commercial sites.

Home school helper

Use the Internet's incredible, free resources with peace of mind.

Use weNetOK with confidence. When students use weNetOK, you can supervise Internet activity with a glance, freeing you to work with other children, do planning activities, etc.

Block email, chat, downloads

With weNetOK, control potentially harmful activities.

No spying

weNetOK doesn't spy on users or track sites visited. With weNetOK, harmful sites are not available and you can offer young people a culture of trust.

The free trial doesn't require your email address or any registration. We want you to try weNetOK without any pressure. We don't like being spammed to make purchases, either.

Serious and fun

weNetOK is suitable for all ages to use the Internet for study and fun.

weNetOk looks like a normal program, not like a video game or cartoon show. This helps to promote using the Internet for study. But it doesn't mean that fun isn't available. Math games, word finds, puzzles, spelling challenges, etc. abound on the Internet and weNetOK makes them available.

Print Option

Save paper and ink by turning off the printing of web pages.

An ideal gift

Grandparents, PTA, PTO — promote child safety. Give weNetOK as a gift. Online purchasing makes this easy. We'll send the purchase receipt and the download directions and serial number in separate emails.

Protecting Children in the 21st Century Act

weNetOK can be a part of your school's strategy for meeting the requirements of the Broadband Data Improvement Act (S.1492), Title II "Protecting Children in the 21st Century Act". Schools can also use weNetOK to help implement acceptable-use policies (AUPs).

Uses Microsoft security updates

weNetOK uses Internet Explorer to display websites. Microsoft provides the critical security updates every browser needs. When you run Windows Update, weNetOK is automatically updated.

Make the IT Department happy

weNetOK doesn't interfere with your existing system setup. weNetOK is compatible with school computer control programs.

Money back guarantee

weNetOK has a 30 day, no hassle, money back guarantee.
